

A photograph of a narrow, moss-covered stone path leading up a steep, forested hillside. The path is made of wooden planks and is flanked by large, mossy rocks. The surrounding area is lush with green ferns and other vegetation. The overall scene is a dense, green forest.

ONE DAY, EVERY CANCER SURVIVOR WILL  
HAVE A SURVIVORSHIP CARE PLAN.

*Journey  
Forward*  
guiding Survivors as they move ahead

*Journey Forward* helps people who have completed active cancer treatment get the information and tools they need to improve their survivorship care.

*Journey Forward* promotes the use of a simple, yet comprehensive, Survivorship Care Plan prepared by the Survivor's oncology team. The plan provides clear, defined steps to guide post-active treatment care and helps doctors work in a coordinated effort.

If you are a Survivor or providing care to a cancer Survivor, go to [JourneyForward.org](http://JourneyForward.org) for more information.

Developed by a unique partnership of organizations with a common goal of improving survivorship care. Collaborators includes:

**National Coalition for Cancer Survivorship**

**UCLA Cancer Survivorship Center**

**WellPoint, Inc.**

**Genentech**
